

Two Astrosociology-Related Events at 2005 ASA Annual Meeting

Event # 1

Astrosociology Forum: Sunday, August 14, 8:00-10:00pm / Room 305 (Marriott Hotel).

Event # 2

Science, Knowledge and Technology (SKAT) Roundtables: Monday, August 15,
2:30– 3:30 pm. (Session: Table 5 -- *Science and Its Disciplines*).

The *Astrosociology Forum* allows for two hours during which advocates (and even critics) can come together to share ideas about astrosociology and its future development. At this time, Jim Pass plans to provide a short PowerPoint presentation to start things. Otherwise, the forum is open to all interested parties without constraints regarding topics discussed.

During the SKAT Roundtables, Jim Pass will discuss the major ideas associated with his paper called *Invitation to Astrosociology: Why the Sociologist-Space Enthusiast Should Consider It* with authors of other accepted papers at Table 5, and additional interested persons. This paper is available on the *Virtual Library* page in the *Astrosociological References* section.
